

PHILIP MAKAFUI SENYO YAW

Software Engineer · Full-Stack & Mobile

SUMMARY

Software engineer with 5+ years building web, mobile and backend systems for clients and telecoms in Ghana, Kenya, South Africa and Botswana. Most recently designed and built TowGo, a vehicle-recovery platform with two Flutter apps, Laravel portals and a Flask + PostGIS API. Experienced with Mobile Money and USSD/SMS integrations, RESTful API design and database performance. Focused on clean architecture, data integrity and software that is simple for the people who use it.

WORK EXPERIENCE

Web & Software Developer Jan 2021 - Present
AWOLABS · Accra

- Build full-stack web and mobile applications end to end, from database design to deployment.
- Design and maintain RESTful APIs that power mobile and web clients.
- Manage cloud deployments and tune database performance for production workloads.
- Integrate third-party services, including payments, SMS and mapping.

Junior Developer May 2023 - Nov 2023
Con-imedia · Accra

- Developed and maintained Laravel/PHP web applications with JavaScript front ends.
- Optimised SQL queries and safeguarded data integrity across client databases.
- Debugged and resolved production issues with the wider engineering team.

Front-End Developer, Media Team (Volunteer) Sep 2019 - Present
Noble Life Assemblies of God · Accra

- Built and maintain the church website and the CIMS-WeCare welfare system for dues, welfare payments, aid tracking and reports (Laravel, Flask, PostgreSQL).
- Support the media team with digital content and video editing.

SELECTED PROJECTS

TowGo: Vehicle recovery platform · 2026 · Flutter, Flask, PostgreSQL/PostGIS, Laravel, Redis, Socket.IO

- Designed and built the full platform: two Flutter apps, six Laravel portal areas and one modular Flask API.
- 237 API operations across 14 modules; one-winner real-time dispatch, photo evidence, custody records and a double-entry ledger; 45/45 end-to-end tests passing.

Veterinary Council of Ghana: Official website · Laravel, Flask, PostgreSQL · vcg.gov.gh

- Built the UI and backend for licensing information, standards and updates.

Kucheza: Safaricom trivia game (Kenya) · Laravel, PHP, Daraja API

- Daily trivia played over web, USSD and SMS, with airtime and cash prizes.

Momo Spin (MTN South Africa) & Orange Box (Orange Botswana) · Laravel, JavaScript

- Mobile Money games built with a team; owned the UI and API integration.

Automation tools · Python, PRAW, Instagram Graph API, Supabase

- Open-source Reddit and Instagram automation bots on GitHub (scheduled posting, engagement analysis, AI content).
